

Secure, convenient payslip portal that
could save your school money!

Remove the monthly hassle of printing your payslips and offer something more secure than sending them via email. Switching to the convenient WCBS ePAYSLIPS means you can make savings on printing costs while offering a safer way of storing and receiving important, confidential documents.

What are WCBS ePAYSLIPS?

WCBS ePAYSLIPS is our electronic PAYE delivery solution. It delivers payslips and P60s through a securely accessed portal, speeding up information flow, and providing searchable, auditable records that work alongside your existing payroll software.

Why use a secure mailing portal?

Emailed payslips are not encrypted and could fall into the wrong hands, when an email containing a payslip is deleted, effectively that payslip, if not saved separately, is lost, and an email is easily forwarded by accident or hacked into, all outside the control of the finance and payroll systems.

WCBS ePAYSLIPS store all the content and historical information securely, which means our customers will never have the risk of deleting, losing or accidentally forwarding their payslips.

What does your school need to deliver WCBS ePAYSLIPS?

Our Payroll module is HMRC accredited and specifically designed for the needs of independent schools.

That's all you need to start saving time and money to deliver important information to your staff in a more secure, convenient way!
