

# Next generation school management information system

HUB  
MIS

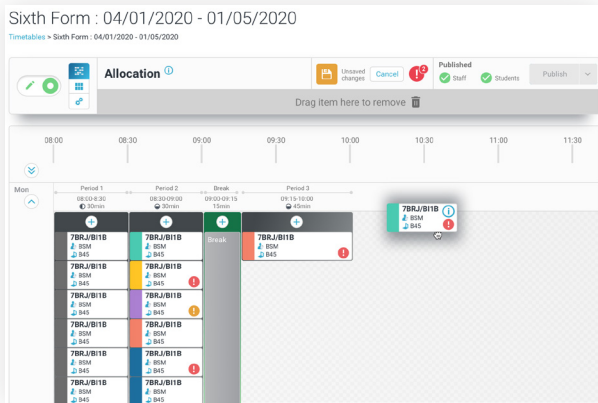

HUBmis is a cloud-native, Software as a Service (SaaS), multi-tenanted solution. It has been designed specifically for independent and international schools of all types and sizes to enhance all areas of information management. It is an excellent alternative to costly servers and provides access to school-specific software.

Whether you are part of a new school, a small school, or a large school group, HUBmis is the perfect solution for you. It is infinitely scalable and modular, so you only pay for what you need. HUBmis provides a global reach with access from anywhere, on any device, and in multiple languages.

The extensive functionality HUBmis offers, by way of a user-friendly and intuitive interface, will support the entire school community. HUBmis will streamline all your administrative procedures, to ensure you can continue to focus on what's important – delivering outstanding education.

## Cloud-native

HUBmis is built and delivered on a robust cloud-native platform, so your school will automatically receive instant software upgrades with almost zero downtime and complete hands-off management. This will save your IT team valuable time and resources, plus there is no need to purchase and maintain expensive hardware and servers.

It can be used anywhere and on any online device which offers flexibility for all staff, students and parents.

HUBmis is an infinitely scalable and modular solution. As your school grows you can purchase extra modules and licences to support your needs.

## KEY FEATURES

- Powerful academic reporting and profiling
- Lesson plans and curriculum management
- Comprehensive dashboards
- Real-time attendance and progress tracking
- Pastoral and behaviour management
- Student and parent online portal
- Events management, calendar and timetable
- Multilingual
- Infinitely scalable

# Supporting the whole school

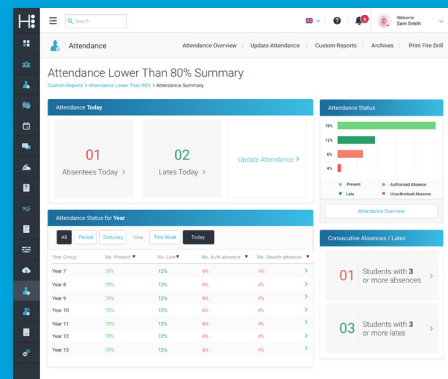

Teachers can track pupils' progress against their peers, individual targets and subject objectives, helping to identify areas for intervention and to create personalised learning plans.

Compile reports at the click of a button, reducing the lengthy process that can impact important teaching and learning time. Choose a pre-designed report from the Reports Portfolio, or have WCBS tailor one to meet your specific criteria.

Real-time attendance and behaviour tracking, with instant reporting and detailed graphs, will help you keep on top of pastoral management and ensure pupils' wellbeing isn't overlooked. Parents can access live records, giving them peace of mind when their child is at school.

Your school office can manage email campaigns, send out global HTML newsletters, push instant messages and set announcements for groups and individuals. Letters can be mail merged with copies available for downloading from an individual's profile.

Staff and pupils can access an online document library that contains important information, from lesson assets and homework, to extra-curricular information and more.
